

Dr George Kaliaden

Invites you to

Parent Effectiveness Training

How to Motivate Your Child?

How to Manage their Behavior?

Description

Parents are constantly looking the best solutions to everyday problems in child behavior management.

How to effectively motivate our children?

How to modify unwanted behavior?

How to enhance positive behavior?

How to improve parent-child relationship?

How to enhance overall happiness of the family?

The stories we share with our colleagues and friends and the solutions that we, in our collective wisdom, try to evolve may not always give us reliable solutions. Research in developmental and behavioral psychology has given us valuable insights into the process through which behavior get shaped. Learning Theory also provides us powerful techniques for removing or extinguishing unwanted behavior in children and teenagers. With extensive training in behavioral psychology (TCU, USA) and with 25 years of practice in psychology and therapy, Dr George Kaliaden provides practical guidance on how to manage everyday problems in child behavior. As a trainer he has conducted more than 160 personal growth training camps for teenagers. He is the author of several books on parenting psychology including "Moulding your Child" which was translated into Arabic and published by Sharjah Government in 1998. The three hour workshop gives parents an opportunity to learn how to change the behavior of their children.

Who Should Attend?

- 1 Couples wanting to learn positive psychology and principles of behavior formation
- 2 Parents of middle school and high school children struggling with behavior management issues and are frustrated that "nothing works"
- 3 Parents of senior students and college students who are unable to communicate effectively with the youngsters and are trying hard to motivate them.
- 4 Teachers who find it difficult to manage classroom behavior of children and teenagers.
- 5 Anyone who wish to learn behavior management principles for their career or professional development .

When you successfully complete this program, you should be able to

- Understand the psychological damages caused by punishment
- Develop a strong motivation to adapt scientific, reliable methods for modifying child behavior
- Learn the basic principles that govern "shaping of behavior" and "extinguishing of behavior"
- Get practical guidance on how to select the right behavioral technique for each behavioral type.
- How to design a behavior modification program for the specific problem that each parent is facing and how to implement it effectively within the given environment,
- How to enhance peace and happiness in the family by resolving conflicts on behavior management.
